(Academic Session: 2026 – 2027)

TALLENTEX PRACTICE QUESTIONS

CLASS 10

MENTAL ABILITY

Your Hard Work Leads to Strong Foundation

Practice Questions

1. The position of how many letters in the word FORGET remains unchanged when they are arranged in alphabetical order?

(1) Two (2) One (3) Three (4) More than three

2. In a cricket season, India defeated Australia twice, West Indies defeated India twice, Australia defeated West Indies twice, India defeated New Zealand twice, and West Indies defeated New Zealand twice. Which country has lost most number of times?

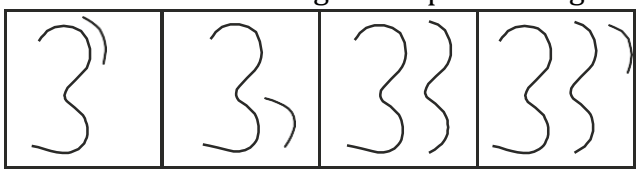

(1) India (2) Australia (3) New Zealand (4) West Indies

3. If the letter in each of the following five groups of letters are first arranged in the alphabetical order and then the groups of letters so formed are arranged as in a dictionary, which letter group would have its group of letters in the middle among the five letters group ?

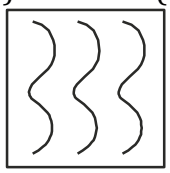

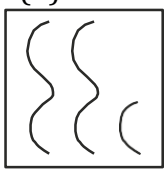

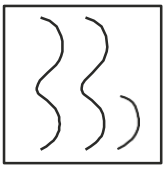

MEET, DEAF, ROAD, CODE, LACK

(1) LACK (2) MEET (3) DEAF (4) ROAD

4. Which figure will continue the same series given in problem figure ?

(A) (B) (C) (D)

(1)  (2)  (3)  (4) 

5. Study the following arrangement of the English alphabet and answer the question given below.

T S F J U V P Q A D B C E Z L W Y H I G K M O N R X

Which letter is eighth to the right of the letter which is exactly the middle letter between T and Y?

(1) C (2) H (3) W (4) Y

6. Pramod, Qureshi, Ranjit, Survesh and Tushar are sitting around a circular table. Ranjit is to the right of Pramod and is second to the left of Survesh. Tushar is not between Pramod and Survesh. Who is second to the left of Ranjit ?

(1) Qureshi (2) Survesh (3) Tushar (4) Can't be determined

7. Which number will replace the question mark in the third set of numbers?

22		6	27		13	17		2
	42			10			?	
16		8	26		7	9		8

(1) 48 (2) 38 (3) 40 (4) 52

8. If the first four letters of the word 'ANTHROPOMORPHISM' are rewritten in the reverse order followed by the next four rewritten in the reverse order followed by the next four letters in the reverse order and so on, which letter will be twelfth from the left end in the rewritten order?

(1) O (2) H (3) M (4) P

9. Read the following information and answer the question based on it.

(I) The length, breadth and height of a rectangular piece of wood are 4 cm, 3 cm, and 5 cm. respectively.

(II) Opposite sides of 5 cm × 4 cm piece are coloured in red colour.

(III) Opposite sides of 4 cm × 3 cm are coloured in blue.

(IV) Rest 5 cm × 3 cm are coloured in green in both sides.

(V) Now the piece is cut in such way that cubes of 1 cm. × 1cm. × 1cm. will be made. How many cubes will have painted at most two faces coloured.

(1) 22 (2) 24

(3) 46 (4) None of these

10. In the given question below are three statements followed by two conclusions numbered I and II. You have to take the three given statements to be true even if they seem to be at variance from commonly known facts and then decide which of the given conclusions logically follows from the three statements disregarding commonly known facts.

Statements : All packets are tents.
All tents are houses.
Some boxes are houses.

Conclusions : I Some houses are packets.
II Some boxes are tents.

(1) If only conclusion I follows

(2) If only conclusion II follows

(3) If either conclusion I or II follows

(4) If neither conclusion I nor II follows

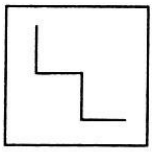

11. In a school, there were five teachers. A and B were teaching Hindi and English. C and D were teaching English and Geography. D and A were teaching Mathematics and Hindi. E and B were teaching History and French.

Who among the following teachers was teaching maximum number of subjects?

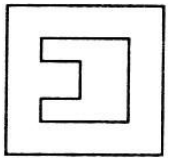

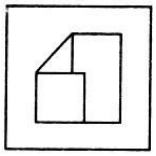

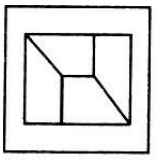

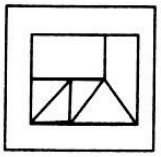

(1) A (2) B

(3) C (4) E

12. Figure (X) is embedded in one of the four alternatives figures (1), (2), (3) and (4). Find the alternative which contains figure (X) as its part.

(X)

(1)  (2)  (3)  (4) 

13. In the given question below are four statements followed by three conclusions numbered I, II and III. You have to take the four given statements to be true even if they seem to be at variance from commonly known facts and then decide which of the given conclusions logically follows from the four statements disregarding commonly known facts.

Statement : (I) All Chilies are Garlics.
(II) Some Garlics are Onions.
(III) All Onions are Potatoes.
(IV) No Potato is Ginger.

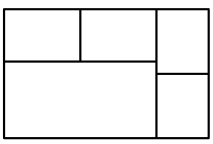

Conclusion : (I) No Onion is Ginger.
(II) Some Garlics are Potatoes.
(III) Some Chillies are Potatoes.

(1) Only I follows (2) Only II follows
(3) Only I & II follows (4) Only I & III follows

14. Rohan introduces Sahil as the "son of the only brother of his father wife". How is Sahil related to Rohan?

(1) Cousin (2) Son (3) Uncle (4) Brother

15. How many rectangles are there in figure?

(1) 6 (2) 7 (3) 8 (4) 9

16. If X is brother of son of Y's son, then how is X related to Y?

(1) Brother (2) Cousin (3) Grandson (4) Son

17. If you count 21 letters in the English alphabet from end and 20 letters from the beginning, which letter will appear in the middle of the sequence thus formed ?

(1) N (2) L (3) K (4) M

18. If A is south of B & C is to the east of B, in what direction is A with respect to C ?

(1) North - East (2) North - West (3) South - East (4) South – West

19. Find the missing number in the place of question mark.

6	6	8
7	9	4
4	3	?
861	261	422

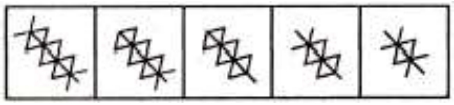

(1) 8 (2) 7 (3) 4 (4) 16

20. If RAVE is coded as SXWB, then how will SCAW be coded?

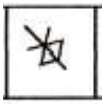

(1) TZBT (2) TZBK (3) PZXK (4) TVXK

21. Pick up from the answer figure, one which will continue the series.

Problem Figure

Answer Figure

(1)  (2)  (3)  (4) 

22. In a class, 20% of the members own only two cars each, 40% of the remaining own three cars each and the remaining members own only one car each. Which of the following statements is definitely true from the given statements?

(1) Only 20% of the total members own three cars each.

(2) 48% of the total members own only one car each.

(3) 60% of the total members own at least two cars each.

(4) 80% of the total members own at least one car.

23. Nitin's age was equal to square of some number last year and the following year it would be cube of a number. If again Nitin's age has to be equal to the cube of some number, then for how long he will have to wait?

(1) 10 years (2) 38 years (3) 39 years (4) 64 years

24. The largest box of shoes contains 459 pieces. The next size box contains 153 pieces. They also sell a box with 51 pieces and one smaller sized box. Based on this pattern, how many pieces are in the smaller sized box?

(1) 15 (2) 37 (3) 27 (4) 17

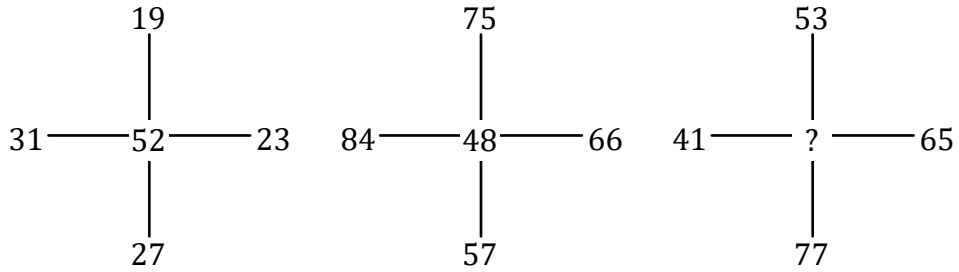

25. One of the elephants in the zoo is on a special diet and eats every day a portion of carrots which is equal to what one of the rabbits eats in one year (365 days). Together, in one day, the elephant and the rabbit eat 111 kilograms of carrots. How many kilograms of carrots does the rabbit eat in one day?

(1) 1/2 (2) 111/165 (3) 37/122 (4) 19/61

26. How many days are there in x weeks x days?

(1) $7x^2$ (2) 8x (3) 14x (4) 7

27. Which number will replace the question mark in the given figures.

(1) 27 (2) 31 (3) 35 (4) 38

28. In the given question, there are statements followed by three conclusions. To take the given statements to be true even if they seem to be at variance from commonly known facts and then decide, which of the given conclusions logically follows from the given statements.

Statements : All tables are jugs.
No jug is rod.
Some rods are hills.

Conclusions : I. Some rods are tables.
II. Some jugs are tables.
III. Some hills are jugs.

(1) Only I follows (2) Only II follows (3) Only III follows (4) I and II follow

29. Read the following information and answer the question .

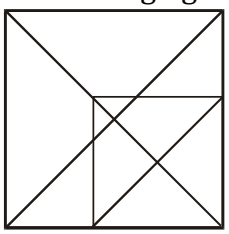

- (X × Y) → X is brother of Y.
- (X + Y) → X is daughter of Y.
- (X – Y) → X is husband of Y.

If (A + B – C), then :

(1) C is mother of A (2) C is sister-in-law of A

(3) C is aunt of A (4) C is mother-in-law of A

30. How many triangles are there in the following figure ?

(1) 15 (2) 16 (3) 18 (4) None of these

31. Introducing a girl, Vipin said, "Her mother is the only daughter of my mother-in-law". How is Vipin related to the girl ?

(1) Uncle (2) Father (3) Brother (4) Husband

32. There are three pillars x, y and z of different heights. Three spiders A, B and C start to climb on these pillars simultaneously. In one chance A climbs on x 5cm but slips down 1cm. B climbs on y 6cm but slips down 3cm. C climbs on z 7cm but slips down 2 cm. If each requires 50 chances to reach the top of the pillar. What is the height of the shortest pillar?

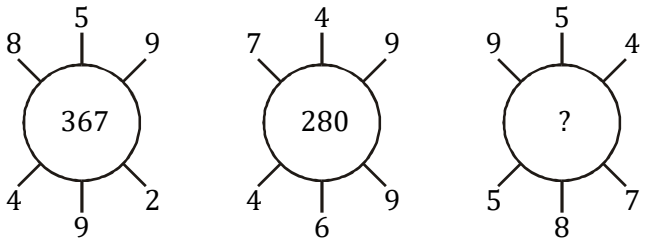

(1) 144 cm (2) 152 cm (3) 153 cm (4) 141 cm

33. Ashish, Bharat, Chandan, Deepak, Esha, Firoz and Gaurav are playing cards sitting in a circle.
(i) Firoz is 2nd to the right of Gaurav.
(ii) Bharat is neighbour of Firoz but not of Esha.
(iii) Esha, neighbour of Chandan, is 4th to the right of Gaurav.
(iv) Deepak is between Esha and Ashish.
Who is fourth to the left of Gaurav?
(1) Deepak (2) Esha (3) Chandan (4) Can't be determined

34. Naveen walked 30 metres towards west, took a right turn and walked 80 metres. Then he took a left turn and walked 30 metres. In which direction is he now from the starting point ?
(1) East (2) South-East (3) North-East (4) North-West

35. Veronika moved a distance of 90 metres towards the north. She then turned to the left and walking for about 35 metres, turned left again and walked 40 metres. Finally, she turned to the right at an angle of 45°. In which direction was she moving finally?
(1) North-East (2) North-West (3) South-East (4) South-West

36. Find the missing character.

(1) 789 (2) 367 (3) 673 (4) None of these

37. If DIAMOND is coded as VQYMKLV, how is FEMALE coded.
(1) TUMYNU (2) UVNZOV (3) UVNYNV (4) TVNYNV

38. Study the following information carefully and answer the question given below it
A sales representative plans to visit each of six companies M, N, P, Q, R and S exactly once during the course of one day. She is setting up her schedule for the day according to the following conditions
(i) She must visit M before N and R.
(ii) She must visit N before Q.
(iii) The third company she visits must be P.
The sales representative could visit any of the following companies immediately after P except.
(1) S (2) R (3) Q (4) M

39. In the following question, you are given a fig. (X) followed by four alternative figures (1), (2), (3) and (4) such that fig. (X) is embedded in one of them. Trace out the alternative figure which contains fig. (X) as its part.

Figure (X)

(1) 
(2) 
(3) 
(4) 

40. In the below question, there are statements followed by three conclusions. To take the given statements to be true even if they seem to be at variance from commonly known facts and then decide, which of the given conclusion and logically follows from the given statements.

Statements : All biscuits are table.
Some tables are brushes.
All brushes are colours.

Conclusions : I. Some colours are biscuits.
II. Some brushes are biscuits.
III. Some colours are tables.

(1) None follows (2) Only II follows (3) Only III follows (4) I and II follows

41. In the given question five problem figures marked A, B, C, D and E and four answer Figures marked 1,2, 3 and 4. Select a figure from amongst the answer Figures which will continue the series.

Problem Figures

A B C D E

Answer Figures

(1)  (2)  (3)  (4) 

42. Sangeeta remembers that her father's birthday was certainly after eighth but before thirteenth of December. Her sister Natasha remembers that their father's birthday was definitely after ninth but before fourteenth of December. On which date of December was their father's birthday?

(1) 10th (2) 11th (3) 12th (4) Data inadequate

43. If $\rightarrow$ stands for 'addition'
$\leftarrow$ stands for 'subtraction'
$\uparrow$ stands for 'division'
$\downarrow$ stands for 'multiplication'
$\square$ stands for 'equal to'
then which of the following alternative is correct

(1) $3 \downarrow 6 \uparrow 2 \rightarrow 3 \leftarrow 6 \square 5$ (2) $4 \downarrow 8 \leftarrow 5 \rightarrow 10 \square 37$
(3) $7 \leftarrow 43 \uparrow 6 \downarrow 1 \square 4$ (4) None of these

44. How many 7's are immediately followed by 6 as well as immediately preceded by 8 in the following sequence.

5 7 6 8 7 7 6 8 7 8 7 6 5 4 7 8 7 6 8 7 6 4 8 7 6

(1) 4 (2) 3 (3) 2 (4) 1

45. If every second Saturday and all Sundays are holidays in a 30 days month beginning on Saturday, then how many working days are there in that month?

(1) 20 (2) 21 (3) 22 (4) 23

46. Ajay left home for the bus stop 15 minutes earlier than usual. It takes 10 minutes to reach the stop. He reached the stop at 8:40 AM. What time does he usually leave home for the bus stop?

(1) 8:30 AM (2) 8:45 AM (3) 8:55 AM (4) None of these

47. Six different faces of a cube are coloured in three different colours black, green and blue. This cube is now cut into 343 smaller but identical cubes. If N is the number of cubes that is not coloured on any of its faces, then which of the following best describes the value of N?

(1) $120 < N < 130$ (2) $120 < N < 125$ (3) $110 < N < 120$ (4) $50 < N < 100$

48. In the given question, two statements followed by four conclusions numbered I, II, III and IV. You have to take the given two statements to be true even if they seem to be at variance from commonly known facts. Read the conclusions and then decide which of the conclusions logically follows from the two given statements.

Statements : I. Some bottles are drinks.
II. All drinks are cups.

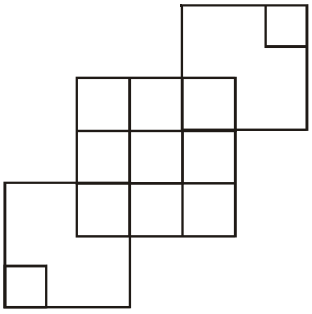

Conclusions : I. Some bottles are cups.
II. Some cups are drinks.
III. All drinks are bottles.
IV. All cups are drinks.

(1) Only I and II follow (2) Only II and III follow
(3) Only II and IV follow (4) Only I and IV follow

49. Soni, who is Dubey's daughter, says to Preeti, "Your mother Shyama is the youngest sister of my father, Dubey's Father's son is Prabhat." How is prabhat related to Preeti?

(1) Uncle (2) Father (3) Grandmother (4) Father-in-law

50. How many squares in the given figure?

(1) 19 (2) 20 (3) 18 (4) 16

51. Study the information given below and answer the question following it.

Mohan is son of Arun's father's sister. Prakash is son of Reva, who is the mother of Vikas and grandmother of Arun. Pranab is the father of Neeta and grandfather of Mohan. Reva is wife of Pranab. How is the Mohan related to Reva?

(1) Grandson (2) Son (3) Nephew (4) Data inadequate

52. Monday falls on 4th April, 1998. What was the day on 5th May, 1998?

(1) Monday (2) Sunday (3) Thursday (4) Wednesday

53. A, B, C, D, E and F are seated in a circle facing the centre. D is between F and B.A is second to the left of D and second to the right of E.

Who is facing A

(1) B (2) D (3) F (4) Either F or B

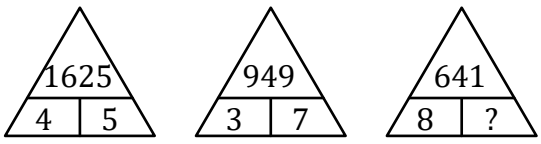

54. Pointing to a photograph Stella says, "He is the son of the only son of my grandmother and I am the only daughter of my parents". How is the man in the photograph related to Stella?

(1) Brother (2) Uncle (3) Cousin (4) Nephew

55. There is a ring road connecting points A, B, C and D. The road is in a complete circular form but having several approach roads leading to the centre. Exactly in the centre of the ring road, there is a tree which is 20 km from point A on the circular road. You have taken a round of the circular road starting from point A and finish at the same point after touching points B, C and D. You then drive 20 km interior towards the tree from point A and from there reach somewhere in between B and C on the ring road. How much distance you have to travel from the tree to reach the point between B and C on the ring road?

(1) 20km (2) 15km (3) 80km (4) 40km

56. Find the missing character.

(1) 2 (2) 3 (3) 4 (4) 1

57. If 453945 stands for DECIDE. then what will stands for 8978

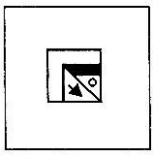

(1) BHEE (2) CDEH (3) GHEE (4) HIGH

58. Anjali and Laxmi are good in Maths and Athletics. Dimple and Anjali are good in Athletics and Studies. Laxmi and Babita are good in GK and Maths. Dimple, Babita and Eshani are good in studies and GK. Eshani and Dimple are good in studies and Biology.

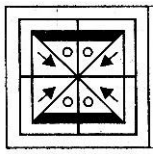

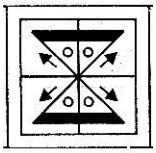

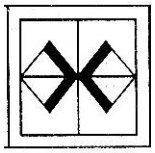

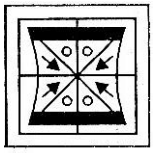

Who is good in studies, GK, Athletics and Biology?

(1) Anjali (2) Babita (3) Laxmi (4) Dimple

59. In the given question below, you are given a figure (X) followed by four figures (1), (2), (3) and (4) such that (X) is embedded in one of them. Trace out the correct alternative.

(X)

(1)  (2)  (3)  (4) 

60. In the question, there are statements followed by three conclusions. To take the given statements to be true even if they seem to be at variance from commonly known facts and then decide, which of the given conclusion and logically follows from the given statements.

Statements : Some pencils are pens.
All pens are buses.
Some buses are trucks.

Conclusions : I. Some trucks are pencils.
II. Some buses are pencils.
III. No truck is pencil.

(1) Only I follows (2) Only II follows
(3) Either I or III and II follows (4) Either I or III follows

61. Babita is Ajay's wife and Chiranjiv is Divya's father. If Ajay's mother-in-law is wife of Divya's grandfather, then what is the relation of Babita with Chiranjiv's wife ?

(1) Sister-in-law (2) Sister (3) Cousin (4) Nephew

62. If 14th February, 2011 falls on Monday then what will be the day on 14th February, 2013?

(1) Friday (2) Tuesday (3) Wednesday (4) Thursday

63. If P > Q, Q > R & R > S, then which of the following conclusions is definitely wrong?

(1) P > S (2) P > R (3) S > P (4) Q > S

Direction (Q.64 and Q. 65): In these questions, some symbols have been used for some mathematical operations as indicated below:

© for 'not less than'; × for 'greater than'; ÷ for 'not equal to'; + for 'not greater than'; ϕ for 'equal to'; Δ for 'less than'.

Using these symbols, choose the correct alternative in each of the following questions.

64. If x © y × z, it implies that

(1) x © y ϕ z (2) x Δ y © z (3) x × z + y (4) z × y × x

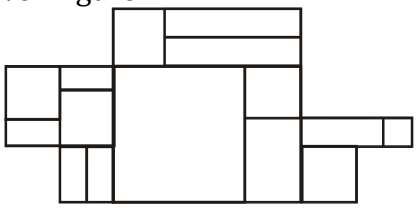

65. If x × y Δ z, it follows that

(1) z + y © x (2) x © y + z (3) y © x × z (4) x ϕ z Δ y

66. In a certain code language, if SOME = 13, CAN = 6, Then PAINT = ?

(1) 15 (2) 60 (3) 12 (4) 20

67. Find the rectangles in the given figure.

(1) 25 (2) 29 (3) 28 (4) None of these

68. Dev is introducing Manish to Rohini. He said, "He is the son of your father's only son-in-law". How is Rohini related to Manish?

(1) Daughter (2) Aunt (3) Sister (4) Mother

69. In the market, some shops are located at a certain distance. The Fish stall is 10m North of the Vegetable shop which is 8m West of the Fruits shop. Spinach shop is 15m East of Grains shop which is 18m North of Fruits shop. The Meat shop is exactly between the Vegetable shop and the Fruit shop.

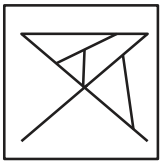

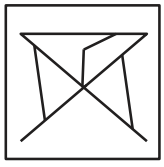

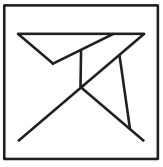

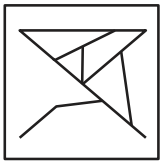

If the Vegetable shop is shifted to the Fish stall then the Fish stall is shifted to the Fruits shop then the Fruits shop is shifted to the Vegetable shop. Then what is the direction of the Vegetable shop with respect to the Grains shop? If the Flower shop is 10m North of the Fish stall, then what is the distance between the Spinach shop and Flower shop (Calculate after interchanging the positions of shop) ?

(1) South-West, 23m (2) South-East, 17m (3) North-East, 23m (4) South-West, 17m

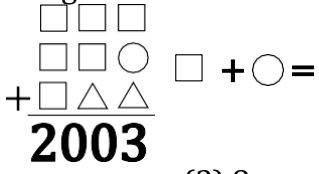

70. In the following question, you are given a figure (X) followed by four alternative figures (1), (2), (3) and (4), such that figure (X) is embedded in one of them. Trace out the alternative figure which contains figure (X) as its part.

(X)

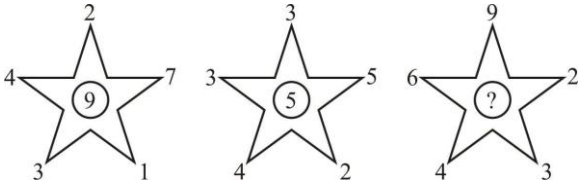

(1)  (2)  (3)  (4) 

71. In the following question, each shape represents a digit, different shapes replace different digits and same shapes replace the same digit. What is the sum of the "Square" and the "circle"?

(1) 6 (2) 7 (3) 8 (4) 9

72. Find the missing term in the given figure.

(1) 4 (2) 7 (3) 10 (4) 11

Direction (Q.73 and Q.74): In these questions, the symbols @, ©, %, ☆ and $ are used with the following meanings as illustrated below:

(i) 'K @ J' means 'K is either greater than or equal to J';

(ii) 'K © J' means 'K is either smaller than or equal to' J';

(iii) 'K % J' means 'K is greater than J';

(iv) 'K ☆ J' means 'K is smaller than J';

(v) 'K $ J' means 'K is neither greater than nor smaller than J'.

Now, in each of the following questions, assuming the given statements to be true, find which of the two conclusions I and II given below them is/are definitely true?

Give answer:

(1) If only conclusion I is true; (2) If only conclusion II is true;

(3) If either conclusion I or II is true; and (4) If both conclusions I and II are true.

73. Statements: N @ I, I % G, G $ P

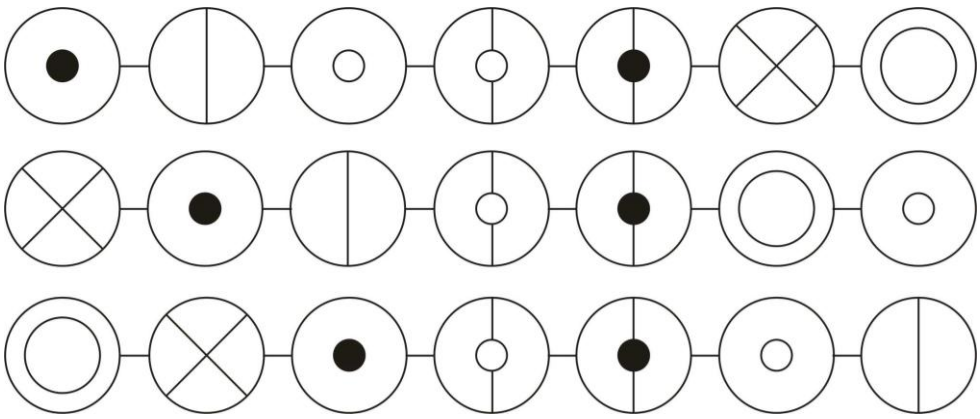

Conclusions: I. P ☆ N II. G ☆ N

74. Statements: S % Q, Y © Q, Y @ U

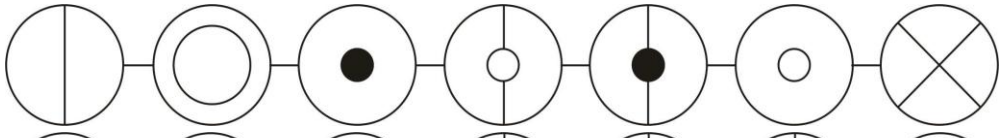

Conclusions: I. U ☆ Q II. U $ Q

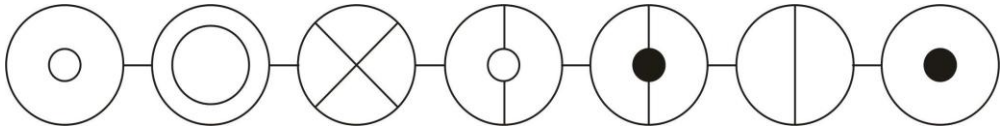

75. Find the next figure in the series from the given answer figures to complete the series.

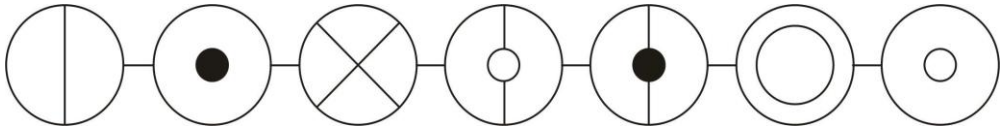

Problem figure:

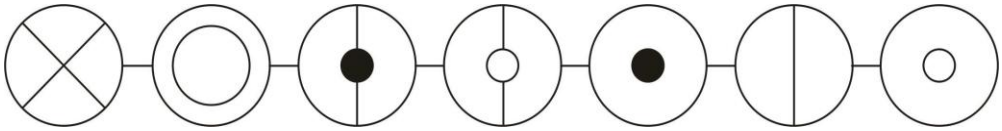

What comes next ?

(1) 

(2) 

(3) 

(4) 

76. In a row of thirty boys, P is fourth from the right end and W is tenth from the left end. How many boys are there between P and W ?

(1) 15 (2) 16 (3) 17 (4) 20

77. A certain number of persons were sitting in a row facing North such that number of persons to the right of Roop was same as the number of persons on the left of Gaur. Gaur sits to the left of Roop. Deep sits exactly in the middle of Roop and Gaur and number of persons between Deep and Roop were twice the number of persons on the right of Roop, who was 58th from the left end. What is the position of Deep from the right end of the row ?

(1) 20th (2) 25th (3) 30th (4) 35th

78. Six persons A, B, C, D, E and F were playing a game of cards. A's father, mother and uncle were in the group. There were two women. B, the mother of A, got more points than her husband. D got more points than E but less than F. Niece of E got lowest points. Father of A got more points than F but could not win the game.

Who won the game ?

(1) A (2) B (3) D (4) F

79. Abraham, Border, Charlie, Dennis and Elmer and their respective wives recently dined together and were seated at a circular table. The seats were so arranged that men and women alternated and each woman was three places distant from her husband. Mrs. Charlie sat to the immediate left of Mr. Abraham. Mrs. Elmer sat two places to the right of Mrs. Border. Who sat to the right of Mr. Abraham?

(1) Mrs. Dennis (2) Mrs. Elmer

(3) Mrs. Border (4) Mrs. Border or Mrs. Dennis

80. Choose the conclusions which logically follow from the given statements.

Statements:- All animals are human

All tigers are human.

Conclusion:- I. Some tigers are animals

II. No tiger is animals.

(1) Only I follows (2) Only II follows

(3) Either I or II follows (4) Neither I nor II follows

81. Pointing to a person in a photograph, a lady said, "His sister is the daughter of my father's son's mother". How is the person related to the lady ?

(1) Sister (2) Brother (3) Nephew (4) Father

82. If 20th February, 1996, which is your date of birth, is a Tuesday. On what day of the week will your birthday fall in the year 1998?

(1) Thursday (2) Tuesday (3) Saturday (4) Friday

Direction (Q.83 & Q.84): These questions are based on the following information:

$\alpha, \beta, \gamma, \delta, \in, \phi, \Psi, \eta$ are sitting on a merry-go-round facing at the centre. δ is second to the left on η who is third to the left of α. β is fourth to the right of γ who is immediate neighbour of η. Ψ is not the neighbour of β or γ. ϕ is not a neighbour of β.

83. Who is third to the left of β?

(1) α (2) γ (3) ϕ (4) Ψ

84. In which of the following pairs is the first person sitting to the immediate right of the second person?

(1) δ,Ψ (2) $\beta,\in$ (3) η,β (4) Ψ,η

85. Eight friends P, Q, R, S, T, U, V and W are sitting around a circle facing the centre. V is third to the right of Q and is second to the left of R. Q is second to the left of T and on the immediate right of S. U is between Q and T. P is not on the left of R. Which of the following is the correct position of W?

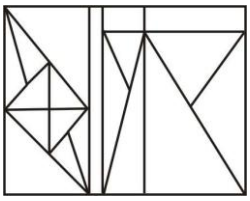

(1) On the immediate left of V (2) On the immediate right of V

(3) Between U and V (4) On the immediate right of R

86. If 'TOPPER' is coded as '8', 'INSTITUTION' is coded as '30', then what is the code of JEEADVANCED?

(1) 55 (2) 24 (3) 30 (4) 19

87. How many triangles are there in the following figure?

(1) 27 (2) 28 (3) 30 (4) None of these

88. Find the next term in the given series:

6, 125, 12, 7, 64, 11, 8, 27, 10, 9, ?

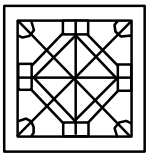

(1) 8 (2) 9 (3) 11 (4) 10

89. Amay and Akshat are two friends studying in ITI. Amay starts walking from his house in North direction. After walking 120 m, he reached the coffee shop. Then he turns and walk 40 m in North-East direction. Then he turns 90° clockwise direction and walks 40 m to reach Akshat's house which is in the East of coffee shop. Then from Akshat's house both of them walk $120\sqrt{2}$ in South-East direction to reach temple which is East of Amay's house. What is the shortest distance between Amay's house and temple ?

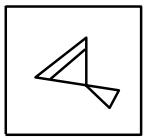

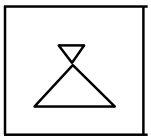

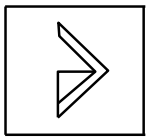

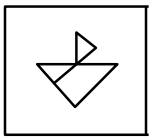

(1) $40\left(3+\sqrt{2}\right)$m (2) $40\left(1+3\sqrt{2}\right)$m (3) $5\left(5+24\sqrt{2}\right)$m (4) $20\left(6+\sqrt{2}\right)$m

90. Which one of the answer figure is hidden in the following question figure ?

Question Figure

Answer Figures

(1)  (2)  (3)  (4) 

91. If x % y = $y^2 - x^2$, x $ y = x ÷ y^2, x # y = 2xy, then value of {(13 % 5) $ 6} # 15 is ?

(1) 480 (2) 720 (3) – 360 (4) – 120

92. Find the missing number in the given figure?

4	3	2	8	23
5	3	1	9	42
7	3	3	7	07
2	9	4	12	?

(1) 48 (2) 120 (3) 27 (4) 60

93. X, Y, Z, P are sitting around a circular table and discussing their trades.

(a) X sits opposite to Cook.

(b) Y sits right to the Barber.

(c) The Washerman is on the left of the Tailor.

(d) P sits opposite to Z.

What are the trades of X and Y?

(1) Tailor and Barber (2) Barber and Cook

(3) Tailor and Cook (4) Tailor and Washerman

94. Six students are sitting in a row. K is sitting between V and R. V is sitting next to M. M is sitting next to B who is sitting on the extreme left and Q is sitting next to R.

Who are sitting adjacent to V?

(1) R and Q (2) B and M (3) K and R (4) M and K

95. If Ajay finds that he is 15th from the right in a line of boys and 6th from the left, how many boys should be added to the line such that there are 38 boys in the line?

(1) 18 (2) 19

(3) 17 (4) 20

96. In a packet, the number of sticks is twice that of balls and all of these are arranged in a row. There is a Red ball and its rank is 18th from the top. Suppose there are 9 sticks ahead of Red ball. If the total articles in the packet are 42, then find the number of balls behind Red ball in the ranking order?

(1) 7 (2) 6

(3) 5 (4) 8

97. If 3 is subtracted from the middle digit of each of the following numbers and then the positions of the digits are reversed, which of the following will be the last digit of the middle number after they are arranged in descending order?

589 362 554 371 442

(1) 1 (2) 2

(3) 3 (4) 4

98. Five friends P, Q, R, S and T have different heights. T is 2nd tallest person in the group. P is taller than only S. R and T both are taller than Q. P is taller than S but shorter than Q. Who is the tallest person of all ?

(1) R or T (2) T

(3) R (4) Q

99. A, B, C, D, E, F, G and H are sitting around a round table facing centre.

There are four male person and four female person in the group. But no two male and no two female are immediate neighbour.

A is the wife of H and she is sitting third to the left of E. F is second to the right of D. D is not immediate neighbour of A and E. H is sitting beside C.

F and his wife B are not sitting beside.

What will be true about 'G' in the given options?

(1) G is a male person

(2) G is sitting between F and H

(3) G is third to the left of E

(4) G is sitting second to the right of B

100. In the following question, some statements are given and these statements are followed by some conclusions. You have to take the given three statements to be true even if they seem to be at variance from commonly known facts. Read the conclusions and then decide which of the given conclusions logically follows from given statements, disregarding commonly known facts.

Statements : All dogs are fruits.
No chair is fruit.
Some chairs are clowns.

Conclusions: I. Some clowns are dogs.
II. Some chairs are dogs.
III. No chair is dog.
IV. No dog is clown.

(1) Either I or IV follows

(2) Either I or IV and III follow

(3) Either I or IV and II follow

(4) Either II or III follows and either I or IV follow
